

EXTREME REGULATOR

NATURAL MICRO ELEMENTS
SUPPLEMENTED WITH ABSORBABLE

ORTHO-SILICIC ACID

N P K
0-0-1

**DUTCH
FERTI**

20 ml
to
100 liter

Extreme regulator is a unique organic biomix consisting of natural micro elements supplemented with absorbable ortho-silicic acid (OSA).

This allows plants to **develop a high resistance** against all kinds of diseases (moulds, viruses, etc.) salt and water stress, and other stress factors such as heat and cold. **Plants become healthier, develop thicker and firmer stems and greener leaves** which are important factors for a good harvest.

Content: *Silicon 0,86% - Boron 0,10% -
Molybdenum <0,01% - Potassium K2O 1,20%*

Extreme Regulator can be applied in combination with any type of fertilizer.
